

**SR 167 Puyallup River Bridge - Bridge Replacement
RFP Questions and Answers # 5 - August 22, 2013**

Question	RFP Reference	Question	Date Received	Response
1	RFP 2.6.6.1	RFP Section 2.6.6.1 requires the submittal of a "Special Inspection Plan (SIP)". This submittal and its intended contents are not defined in the RFP or contract documents. Please clarify the purpose of this submittal and what are its required contents.	8/16/2013	The requirement for a SIP will be deleted in Addendum #7.
2	Geotechnical	Please confirm WSDOT is not receptive to the reduction in the factor of safety from 1.25 to 1.0 for oversized shafts in the liquefied configuration as discussed in Seismic Guide Spec Section 8.9.	8/16/2013	This is correct.
3	Geotechnical	Please confirm in-ground hinging in the ERS is not acceptable to WSDOT for the liquefied configuration in below ground foundations elements such as piles and drilled shafts.	8/16/2013	This is correct.
